CS0019 MODELING AND SIMULATION

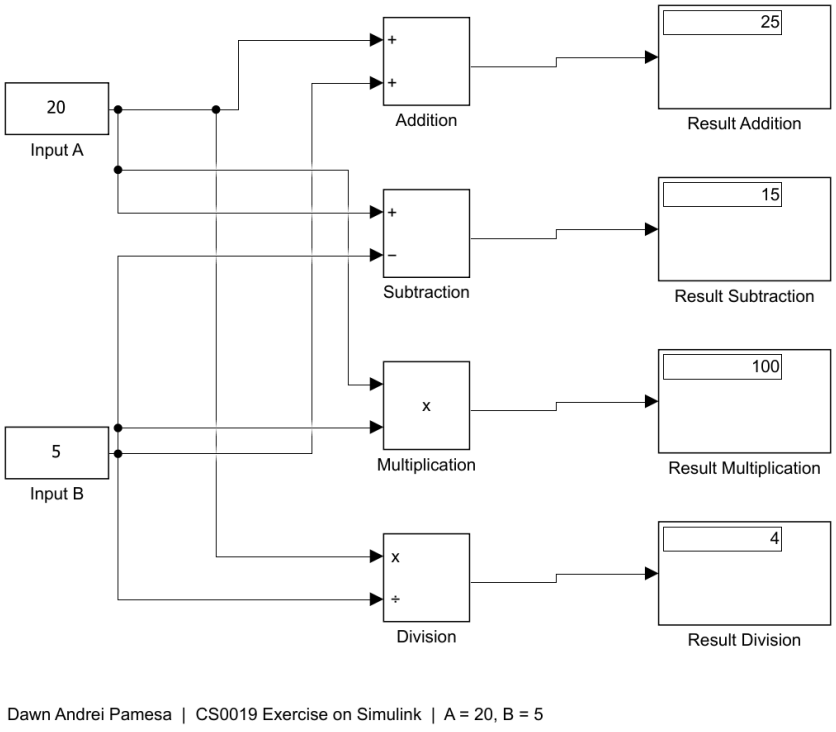

EXERCISE ON SIMULINK

Simple Arithmetic in Simulink

Name: Dawn Andrei Pamesa
Section: TS31
Date: October 23, 2026

Simulink Diagram with Sample Input Values and Output

The diagram has two Constant blocks (Input A = 20 and Input B = 5) that feed four blocks: Add, Subtract, Product (multiplication) and Product with a divide input. Each result goes to a Display block, which shows the output after the model is run (file: PAMESA_ExerciseOnSimulink.slx).

Results

Operation	Input A	Input B	Output
Addition	20	5	25
Subtraction	20	5	15
Multiplication	20	5	100
Division	20	5	4
