Questions for Consultation

Sir Pura and Ma'am (Doc Beau)

The two sets of guidance we have received are different. Ma'am's ranking on 2026-10-04 included titles that use public data, while Sir Pura's rules on 2026-10-10 do not allow open-source data and ask for a client. We would like to follow one set of rules, so these are our questions.

Questions for Sir Pura

1. When you said no open-source data, did you mean the main dataset only? Could public data be used as supporting or benchmark data if a private client supplies the main records?
2. What counts as a client? Does it have to be the one that owns the data, or can a private organization that commits to using the finished tool count?
3. Is a government dataset acceptable when the client is private? Does a civic group or an NGO count as a client?
4. What counts as a row? Would route-level or cause-level tables from PSA count toward the 5,000 minimum, or must each row be a single record?
5. Is a synthetic dataset allowed to count toward the minimum, or only real records?
6. Is a client reached through a family contact acceptable? We have a construction firm in Valenzuela, Aquaplus and Arkidom as leads.
7. By when must the client and the data be confirmed before the title defense, and can we defend with one main title and one fallback?
8. What do we need from a client in writing, such as a data permission letter or a non-disclosure agreement, and does ethics review need anything extra for private data?

Questions for Ma'am (Doc Beau)

1. Your ranking on 2026-10-04 used public data, and Sir Pura's rules do not allow it. Which rule should we follow for the title defense?
2. If a title keeps public data but adds a private client, would you still rank it where you did? Where would the grid title sit then?
3. Does the 10,000-record minimum apply to aggregated tables such as the PSA ones, or only to record-level data?
4. Will the panel accept a title whose main data is public if the client angle is strong, or will it follow Sir Pura's rule?
5. Which SDGs fit best for procurement (16.5 and 16.6), freight and energy, and are those acceptable?

6. Can you confirm in writing on Canvas which titles are still eligible, so the group has one answer?

We would appreciate written confirmation on Canvas so that the whole group has the same answer.

Prepared with AI assistance (Claude) and to be reworded by the group. The PhilGEPS and air cargo counts were checked on 2026-10-16 and the other figures on 2026-10-04.
