Interview Questions for V.M. Daet Construction

About the Company

1. How long has the company been operating?

2. How many people work in the company, and what are the main roles?

3. What do you mainly do: build projects, supply materials, or both?

4. What kinds of projects do you handle, and what is the usual size or budget?

5. Who are your main clients: private, government, or both?

6. How does the business work, from getting a project to finishing it?

Problems

7. What are the biggest problems you face day to day?

8. What causes the most delays or loses the most money?

9. What is hardest to predict or plan? (materials needed, project cost, project timeline, manpower, equipment)

10. Which decisions do you make mostly by experience that you wish you had numbers for?

11. Do you have problems with late deliveries, price changes, too much or too little stock, or late payments?

12. Do the problems get worse in certain months, like the rainy season or the end of the year?

13. What have you already tried to fix these problems, and what happened?

14. If we could solve only one of these for you, which would help the most?

Materials and Suppliers

15. Which materials do you buy or supply the most? (cement, steel, sand, gravel, lumber)

16. How do you decide how much to order and when?

17. How many suppliers do you use, and how long do deliveries usually take?

18. How often do material prices change, and how do you handle that?

19. Do you keep stock in a warehouse, and how do you count it?

Projects and Costs

20. How do you estimate the cost of a project before you start?

21. How often does the final cost end up different from the estimate, and why?

22. How do you track the progress and schedule of a project?

23. What usually causes a project to finish late?

Records and Tools

24. What records do you keep now? Is it in Excel, a system, or on paper?

25. Who keeps the records, and how often are they updated?

26. What software or tools do you use now? (Excel, accounting software, messaging apps)

27. How far back do the records go? Do you have them from 2021 until now?

28. What does each record have? (date, item, quantity, price, supplier, project)

29. Are the records complete, or are some missing or written in different ways?

30. Would you share a copy with names and prices hidden?

31. Is there a form we should sign for confidentiality?

About the Study

32. Who in the company would we work with and report to?

33. Would the management be open to trying a tool that gives forecasts or suggestions?

34. What would make a tool like this useful enough that your team would actually use it?

35. Is there anything we should not use or ask about?
