[INSTITUTION / COLLEGE NAME] · ACADEMIC AFFAIRS

AI Use Declaration Form

Complete this declaration for the specific activity you are submitting. Declare only the AI use associated with this assessment.

COURSE: CS0019 - TS31	ACTIVITY / ASSESSMENT: Exercise on Simulink
STUDENT: Dawn Andrei Pamesa	DATE: October 23, 2026
STUDENT AI LEARNING CODE: maroonmelon	ASSIGNED PROMPT PARAMETERS: *Perspective/persona if applicable*

01 Assessment Classification

- (●) **AI-Assisted**
  AI use was permitted but optional. Select the applicable declaration pathway in Section 02.
- ( ) **AI-Integrated**
  Responsible AI use was required as part of the activity. Complete the detailed process evidence and attach required interaction records.

AI Use Status

- (●) I used generative AI for this activity.
- ( ) I did not use generative AI for this activity. **Available only for AI-Assisted activities.**

If you did not use AI, leave Sections 02–03 blank, complete the References section when applicable, and sign the declaration.

02 Short Declaration — AI-Assisted

AI Chat Link(s)	*Paste the shareable link or links to your AI conversation*
Conversation Copy	☐ I attached a PDF or instructor-approved copy of the AI conversation, when required.
AI Tool(s)	Claude (Anthropic), through Claude Code, model Sonnet 5.5.
Purpose of Use	To build the Simulink model for this exercise with a script and check that it gives the right outputs.
Material Influence	The diagram layout and the block settings came from the AI (two Constant blocks, Add, Subtract, Product and Divide blocks, and a Display block for each result). The two input values, 20 and 5, are simple sample values.
Verification & Revision	I ran the model in Simulink (MATLAB R2026a), and the Display blocks showed 25, 15, 100 and 4. These match 20 + 5, 20 - 5, 20 x 5 and 20 / 5 worked out by hand.

03 Detailed Declaration — AI-Integrated

Complete this section for an Expanded AI-Assisted declaration or every AI-Integrated declaration. Attach selected interaction evidence only when the assessment requires it.

AI Chat Link(s)	*Paste the shareable link or links to your AI conversation*
Conversation Copy	☐ I attached a PDF or instructor-approved copy of the AI conversation as required.
Key Prompt(s)	*List the prompts that materially influenced the work.*
AI Output Used	*Briefly identify the output or ideas used.*
Critical Evaluation	*What did you accept, modify, question, or reject, and why?*
Independent Verification	*Sources, calculations, tests, or other checks used to verify the AI output.*
Human Contribution	*What decisions, reasoning, analysis, drafting, testing, or revisions did you perform?*
Final Influence	*Which parts of the final submission were materially influenced by AI?*
Interaction Evidence	*Identify the screenshots, excerpts, or records attached, if required.*

04 References and Verification Sources

List the course materials, official documentation, scholarly sources, datasets, or other reliable references used in the final work or to verify AI-generated information. Follow the citation style required by the assessment. An AI conversation link does not replace required academic references.

References	*List your references using the citation style required by the assessment*
Verification Use	The arithmetic worked out by hand was used to check the outputs of the model.

05 Student Declaration

I declare that this form accurately describes whether and how I used generative AI for this specific activity. I followed the AI-use rules stated in the assessment, used and cited appropriate references, reviewed and verified AI-assisted content when applicable, and remain responsible for the accuracy, quality, integrity, and understanding of my final submission.

STUDENT SIGNATURE / CONFIRMATION	DATE
Dawn Andrei Pamesa	October 23, 2026

06 Submission Check

- [x] I followed the assessment's permitted AI functions.
- [x] I used the assigned Student AI Learning Code and prompt parameters, when applicable.
- [x] I did not enter protected or unnecessary personal information into an external AI system.
- [x] I can explain and defend the submitted work when asked.
- [x] I cited the references required by the assessment and used reliable sources to verify the work, when applicable.
- [x] I attached the additional AI interaction/process evidence required by the assessment, if applicable.

Use: Submit this declaration with the specific AI-Assisted or AI-Integrated activity. A student may select No AI Used only for an AI-Assisted activity. Complete the short declaration for routine AI-Assisted use and the detailed declaration for expanded AI-Assisted use or every AI-Integrated activity, as instructed.

Privacy: Do not place your name, Student ID number, email address, phone number, address, passwords, or other sensitive or identifying information inside external AI prompts unless specifically authorized by the institution.

Conversation Copy: Before sharing a conversation link or copy, remove or redact unnecessary personal, confidential, or unrelated information. Submit the complete activity-related conversation when required; do not fabricate, reconstruct,

or selectively alter the record.
