[INSTITUTION / COLLEGE NAME] · ACADEMIC AFFAIRS

AI Use Declaration Form

Complete this declaration for the specific activity you are submitting. Declare only the AI use associated with this assessment.

COURSE: CS0019 - TS31	ACTIVITY / ASSESSMENT: Technical Assessment 3
STUDENT: Dawn Andrei Pamesa	DATE: October 23, 2026
STUDENT AI LEARNING CODE: maroonmelon	ASSIGNED PROMPT PARAMETERS: *Perspective/persona if applicable*

01 Assessment Classification

- ○ **AI-Assisted**
  AI use was permitted but optional. Select the applicable declaration pathway in Section 02.
- ◉ **AI-Integrated**
  Responsible AI use was required as part of the activity. Complete the detailed process evidence and attach required interaction records.

AI Use Status

- ◉ I used generative AI for this activity.
- ○ I did not use generative AI for this activity. **Available only for AI-Assisted activities.**

If you did not use AI, leave Sections 02–03 blank, complete the References section when applicable, and sign the declaration.

02 Short Declaration — AI-Assisted

AI Chat Link(s)	*Paste the shareable link or links to your AI conversation*
Conversation Copy	☐ I attached a PDF or instructor-approved copy of the AI conversation, when required.
AI Tool(s)	*Tool and model/version, when available*
Purpose of Use	*What permitted support did AI provide?*
Material Influence	*What part of your work was materially influenced, if any?*
Verification & Revision	*How did you verify, modify, or reject the output?*

03 Detailed Declaration — AI-Integrated

Complete this section for an Expanded AI-Assisted declaration or every AI-Integrated declaration. Attach selected interaction evidence only when the assessment requires it.

AI Chat Link(s)	*Paste the shareable link or links to your AI conversation*
Conversation Copy	☐ I attached a PDF or instructor-approved copy of the AI conversation as required.
Key Prompt(s)	I gave Claude (Claude Code, Sonnet 5.5) the Technical Assessment 3 instructions and asked for the MATLAB Monte Carlo script for Lucky 9 in my own style. I then asked it to check that the simulated numbers were believable, and to answer the three questions in my
AI Output Used	The MATLAB script (deck, mod 10 totals, win rules, expected value), the exact-probability check, and the first draft of the answers to the three questions.
Critical Evaluation	I accepted the script structure because the rules in the instructions map to it directly (higher total wins, dealer wins ties). I did not trust the simulation numbers on their own, so I compared them with an exact count of every possible deal.
Independent Verification	I ran the script in MATLAB with a fixed seed. Separately, every possible four-card deal from the deck (6,497,400 deals) was counted outside MATLAB, giving a player win probability of 0.4505 and an expected value of PHP -0.99 for a PHP 10 bet. The simulation at N =
Human Contribution	I read the script line by line, ran it myself in MATLAB, and checked that every number in my answers matches the output. I can explain each step of the script.
Final Influence	he script and the first draft of the written answers were materially influenced by AI. Every number in the PDF comes from the script output.
Interaction Evidence	*Identify the screenshots, excerpts, or records attached, if required.*

04 References and Verification Sources

List the course materials, official documentation, scholarly sources, datasets, or other reliable references used in the final work or to verify AI-generated information. Follow the citation style required by the assessment. An AI conversation link does not replace required academic references.

References	*List your references using the citation style required by the assessment*
Verification Use	e: The assessment brief gave the card values, the rules and the expected value formula, and I used it to check that the script answers every required item.

05 Student Declaration

I declare that this form accurately describes whether and how I used generative AI for this specific activity. I followed the AI-use rules stated in the assessment, used and cited appropriate references, reviewed and verified AI-assisted content when applicable, and remain responsible for the accuracy, quality, integrity, and understanding of my final submission.

STUDENT SIGNATURE / CONFIRMATION: Dawn Andrei Pamesa

DATE: October 23, 2026

06 Submission Check

- [x] I followed the assessment's permitted AI functions.
- [x] I used the assigned Student AI Learning Code and prompt parameters, when applicable.
- [x] I did not enter protected or unnecessary personal information into an external AI system.
- [x] I can explain and defend the submitted work when asked.
- [x] I cited the references required by the assessment and used reliable sources to verify the work, when applicable.
- [x] I attached the additional AI interaction/process evidence required by the assessment, if applicable.

Use: Submit this declaration with the specific AI-Assisted or AI-Integrated activity. A student may select No AI Used only for an AI-Assisted activity. Complete the short declaration for routine AI-Assisted use and the detailed declaration for expanded AI-Assisted use or every AI-Integrated activity, as instructed.

Privacy: Do not place your name, Student ID number, email address, phone number, address, passwords, or other sensitive or identifying information inside external AI prompts unless specifically authorized by the institution.

Conversation Copy: Before sharing a conversation link or copy, remove or redact unnecessary personal, confidential, or unrelated information. Submit the complete activity-related conversation when required; do not fabricate, reconstruct,

or selectively alter the record.
